

CARVER CLAMP SERIES

Applications

C-Style Carver Clamps

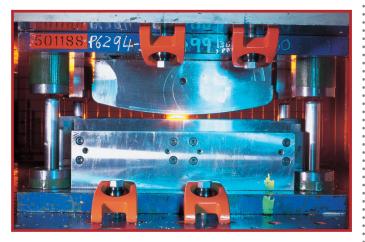

- Adjustment screw is shielded and out of the work area
- Ideal for rugged welding & fabrication jobs
- Holds round or flat objects
- Holding capacities to 27kN [6,000lb.]

Bar Style Carver Clamps

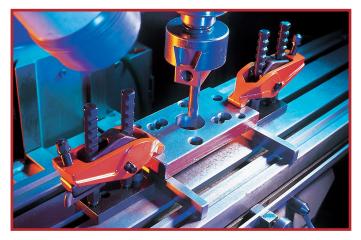

- Removable jaws can be reversed to provide spreading action
- Multiple jaws can be used on a single bar for positive part positioning
- Holding capacities to 27kN [6,000lb.]

Buttress Style Carver Clamps

- Eliminates need for step blocks/riser blocks
- Self aligning swiveling pivot provides vertical clamping force over a wide range of workpiece heights
- T-bolt sizes M12 to M24[1/2" to 1"], capacities up to 80kN [18,000lb.]
- Ideally suited for T-slot machining tables or manual die clamping

T-Slot Style Carver Clamps

- Rapid height adjustment reduces set-up times by as much as 80%
- 100% of clamping force is transmitted to workpiece
- Ideal for use as manual die clamps.
- Holding capacities to 25kN [5,620lb.]

Typical Applications

Bar Clamps

"C" Clamps

No obstruction from long screw. Ideal for structural steel fabrication.

Unaffected by weld spatter. Screw is shielded and out of work area.

Holds rounds to flats. Limited movement of moveable jaw pad and grooved face ensure positive grip on round objects.

BAR-STYLE SERIES

CARVER Clamps | Product Overview

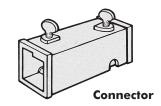

Features:

These rugged clamps, made from high-tensile, heat-treated steel, are designed for all types of applications requiring large holding capacities from 1270 lbf to 6000 lbf (5650N to 27000N). The clamps are highly versatile. For example, jaws can be reversed to provide spreading action, or several jaws can be used on a single bar both for fixturing and positive component location and clamping.

Available models include T321 Standard-Duty Deep Throat, T285 Medium-Duty Deep Throat, T186 Standard-Duty, T290 Medium-Duty and T257 Heavy-Duty. In addition, standard and medium-duty connectors are available to couple like bars together for increased clamping reaches.

C-STYLE SERIES

CARVER Clamps | Product Overview, Dimensions

Features:

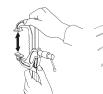

Operation is very simple. The operator slides the spring loaded moveable jaw toward the workpiece to the nearest notch where it locks into the detent. Hand tightening the screw advances the clamp jaw. The jaw advances the tilting pad directly into contact with the workpiece – there is no rotating to twist the work or the clamp out of position.

An unusual and very useful feature of these clamps is the ability to use the clamp for spreading or locating as well as squeezing.

1. Loosen Screw

2. Push In Jaw Base

3. Slide Jaw Up or Down

4. Tighten Screw

BUTTRESS SERIES

CARVER Clamps | Product Overview

Features:

These workholding clamps are designed for use on thin or low-profile workpieces replacing ordinary strap clamps. They feature a self-aligning swiveling pivot which allows the tightening bolt to always remain vertical, preventing any side forces. The two-point contact offered by Models T614-0 and T614-1 also provides greater stability to the workpiece. Ideally suited for manual die clamping. Eliminates the need for step blocks or riser blocks.

CARVER Clamps | Product Overview

Features:

These clamps provide rapid height adjustment and positive holding. They are designed with a single-unit clamp head and base. The DE-STA-CO Carver T-Slot Clamp is one single assembly – there are no loose parts. When setting up, the safety lock on the back is released and the clamp lifted on the base to the desired height. When the clamp screw is turned, 100% of the force is transmitted to the work-piece. Backing off the clamp adjusting screw and releasing the safety lock and lifting the clamp head makes for rapid job changeover.

If the clamping height is more than [29.5in] 750mm the connector shown below will be delivered as standard equipment.

CARVER Clamps | Product Overview

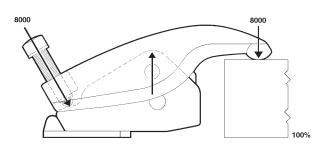

These clamps provide rapid height adjustment and positive holding. They are designed with a single-unit clamp head and base, providing up to [8000 lbf] 35.6kn. of positive holding capacity for workpieces up to 60" high. The design applies 100% of the screw

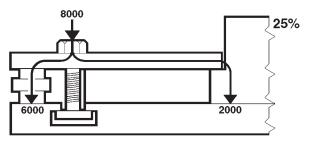

force directly onto the workpiece far more than any strap clamp arrangement. Additionally, there is no searching for the correct riser block height. The DE-STA-CO Carver T-Slot Clamp is one single assembly – there are no loose parts.

When setting up, the safety lock on the back is released and the clamp lifted on the base to the desired height. When the clamp screw is turned, 100% of the force is transmitted to the workpiece. Backing off the clamp adjusting screw and releasing the safety lock and lifting the clamp head makes for rapid job changeover.

Ideal for use as manual die clamps. Eliminates the need for step blocks or riser blocks.

Safety – No loose parts. Clamp and base are one unit. Higher clamping force holds parts more securely and safely.

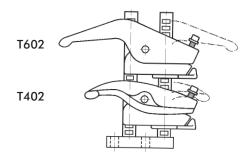

Speed – The clamp head adjusts much faster than an operator can select proper size spacers and bolts. Benefits include:

- Cuts set-up time by as much as 80%
- Reduces machine downtime
- Offers more rapid loading and unloading

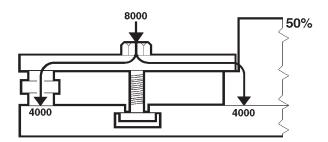

Economy – Tool tip technology and digital control have reduced machining time. Why lose these advantages on long set-up times? T-Slot clamps can reduce set-up time by as much as 80%. Benefit: Money saved.

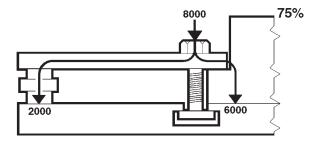

Ease of Operation – Loosen adjusting screw and release safety catch to adjust height instantly.

Versatility - Selection of bases gives standard clamping heights from 0 to 600mm[0 to 24in.]. Additional heights available up to 1500mm[60in.] are available upon request. Two or more heads can be used on one base to position and hold down as well as support – ideal for fine height adjustment during set-up. Also eliminates riser blocks.

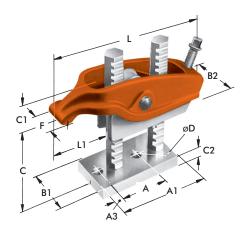

The T402 and T602 can be reversed on their bases to give added reach.
