About us

Our company was founded in 2008, our main activity is the trade of components used in automation, machine building.

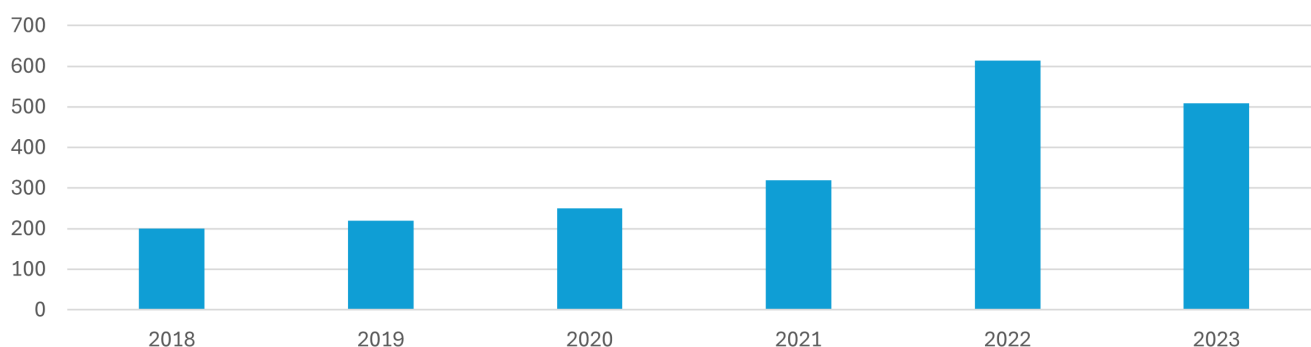

Our work does not stop with the preparation and sale of a suitable offer. Together with our products, we also provide our partners with the right services, both professional and technical. We strive to provide our customers with the best quality so that they always get what they expect.

We are in contact with the largest manufacturers, but we can also offer customized solutions from smaller manufacturers to provide our partners with safe, efficient and high-performance solutions to give them a competitive advantage in their field.

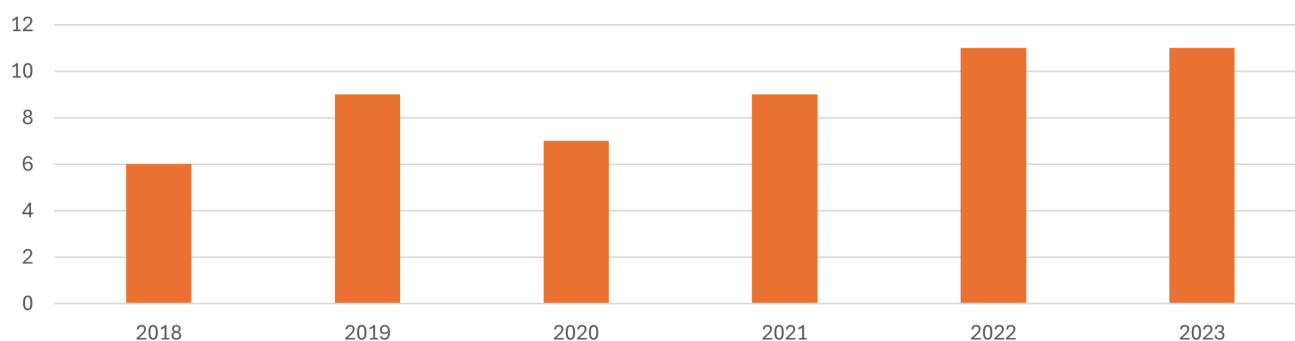

We do not offer our partners a simple trading company based on catalogue pages, but an active team of qualified professionals with years of experience in industrial automation.

The work we do on our projects is not only done, but enjoyed. Because every project is different, we can always come up with new ideas and solutions. We do not see our competitors as competitors, but work together to achieve a common goal in the market.

What do we do? / Our activities

Destaco products

As an official distributor of DESTACO in Hungary, we distribute grippers, clamps, rotary indexers and other robotic applications.

GoodHand products

We distribute vertical, horizontal and push-pull toggle clamps, toggle latches and other applications as an official distributor of GoodHand.

Aluminium profile systems

We offer ITEM and Bosch compatible systems, as well as alternative accessories for these systems, at lower prices and with the same technical parameters.

Pneumatic

To build a pneumatic system, you need a wide range of air units and passive elements. We can assist you in the procurement of these products, as well as in the design, sizing and construction of your pneumatic system.

Automation components (Kipp / Norelem)

We distributed officially Kipp products. Like distribute clamp levers, grips, handles, hinges, levelling sets and other applications.

Aluminium frames, safety cages

We not only cut and machine our profiles to size, but also assemble them if required. We also manufacture protective cages for robotic workstations, with various solutions.

Fezer, Z-Laser

Vacuum lifting devices and laser solutions for assembly and commissioning.
